## COMPACT TWO WAY TRAFFIC MIRROR

Face View

Rear View Including Bracket

This pair of acrylic mirrors is designed to give clear two way vision into narrow lanes, warehouse passageways and factory roads. The use of two mirrors permits a much better view in each direction than a single 180° dome mirror and offers an near full size image.

The shatter resistant acrylic mirrors are mounted in robust ABS housings with a rigid adjustable aluminium bracket.

The mirrors dimensions are nominal 300x220mm each projecting 250mm from the mounting position.

Mirror Technology manufacture a wide range of specialised mirrors in plastic and stainless steel for traffic, safety, and security applications. Full details are available on request
